

E Green Solutions Inc. – Capabilities Statement

Edwin Green III – Brief Bio

Edwin Green III brings 30+ years of technical expertise in electronic systems and renewable energy. A former Naval Aircrewman Avionics Electronic Technician with 15 years of service, he is skilled in mission-critical system maintenance, calibration, and engineering. His combined military precision, applied science education, and business acumen position him to lead innovative, compliant, and scalable clean energy projects for government and commercial clients.

Mission

Deliver innovative clean energy and environmental services that enable safer, healthier, and more sustainable operations for government and commercial clients.

Core Competencies

EV Charging Solutions – Design, engineering, and installation (Level 2 to DC Fast Chargers) for commercial, residential, fleet, and infrastructure projects.

Clean Energy Consulting

Site assessment, system integration, and optimization of rebates/tax incentives.

Environmental Cleaning & Disinfection

Electrostatic, touchless sanitization with non-caustic products for safer workplaces.

Regulatory Compliance

Support for local, state, and federal programs, procurement readiness, and contract management.

National Deployment & Support

Activation, training, and ongoing service through a trusted partner network.

Unique Id Number & Cage Code

Unique Id Number - XE4RWDABC5A9
Cage Code 15FD7
